How to Enable the Pop-up in Chrome, Firefox, or Internet Explorer

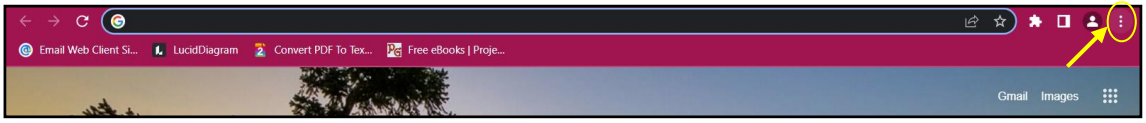

How to Enable the Pop-up in Chrome, Firefox, or Internet Explorer

(If the below mentioned instructions are not consistent with your browser experience, you may not be using the version that was current at the time this document was created. In this case, please search the internet for instructions on how to disable the pop-up blocker on your browser.)

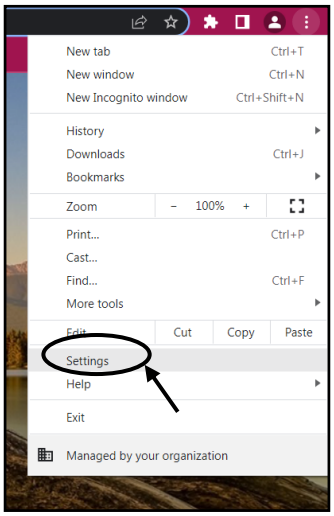

Google Chrome [Version 106.0.5249.119 (Official Build, 64-bit)]

1. On your computer, open **Google Chrome**.

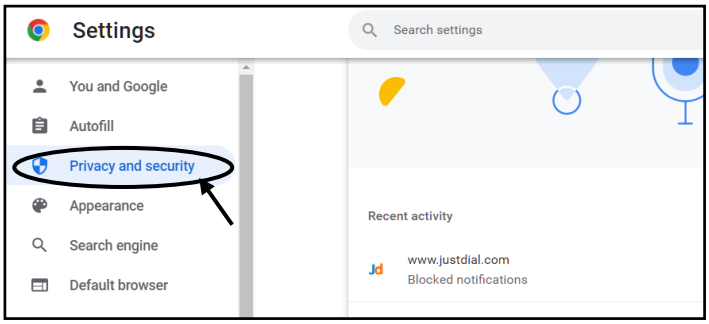

2. At the top right, click **Customize and control Google Chrome**.

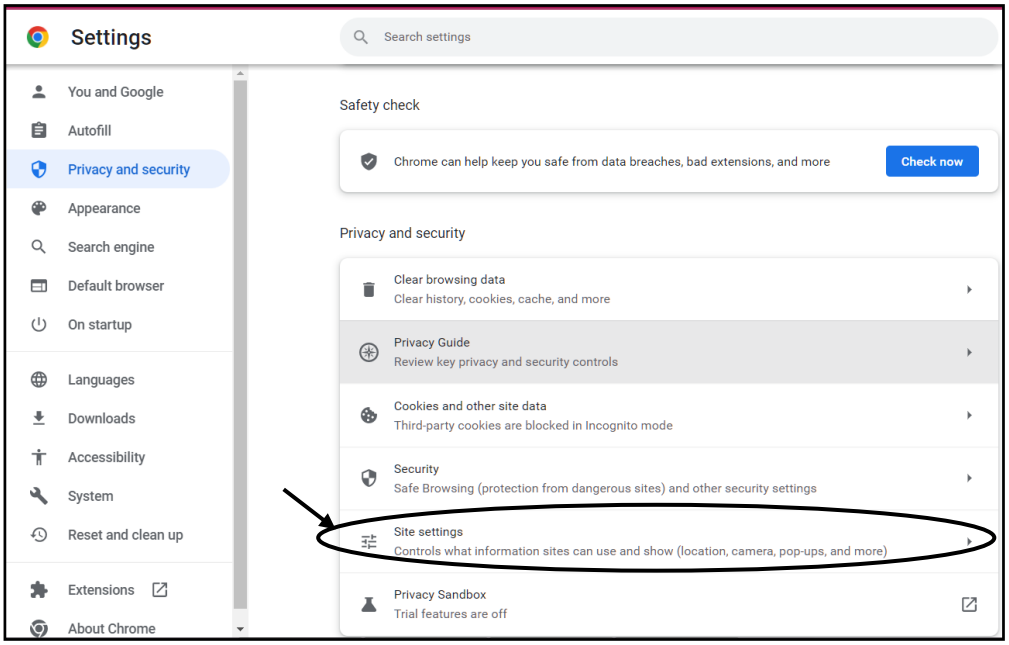

3. Click **Settings**.

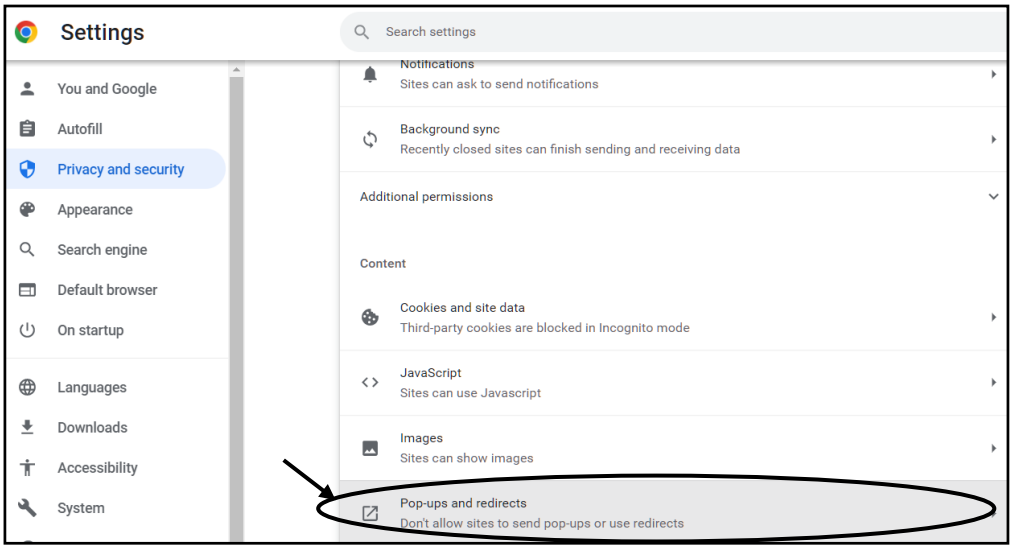

4. Click **Privacy and Security**.

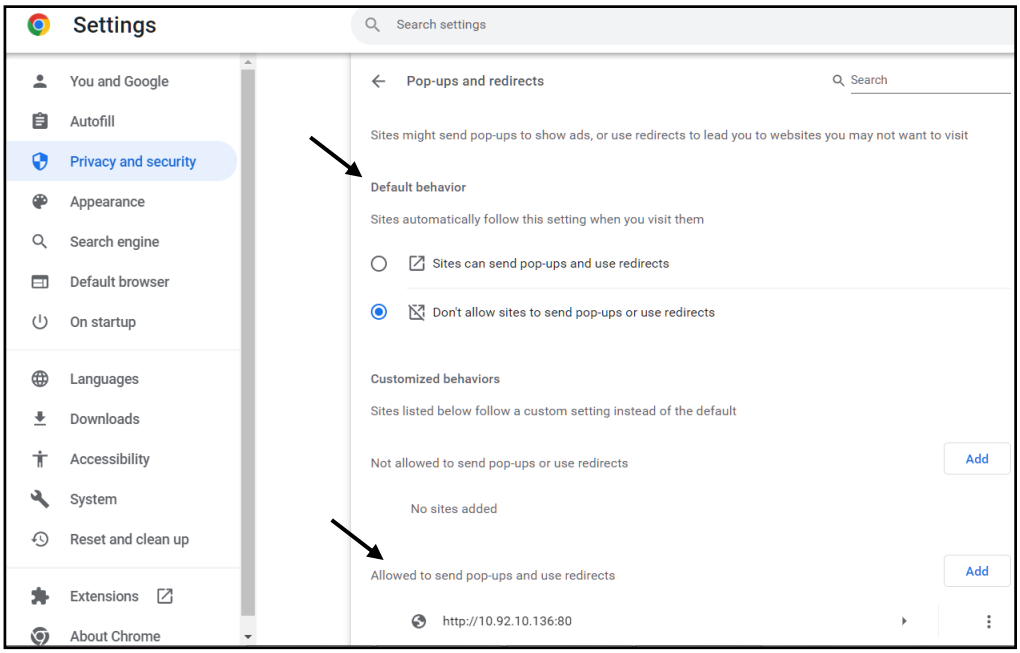

5. Click on **Site Settings**.

6. Scroll down and click on **Pop-ups and redirects**.

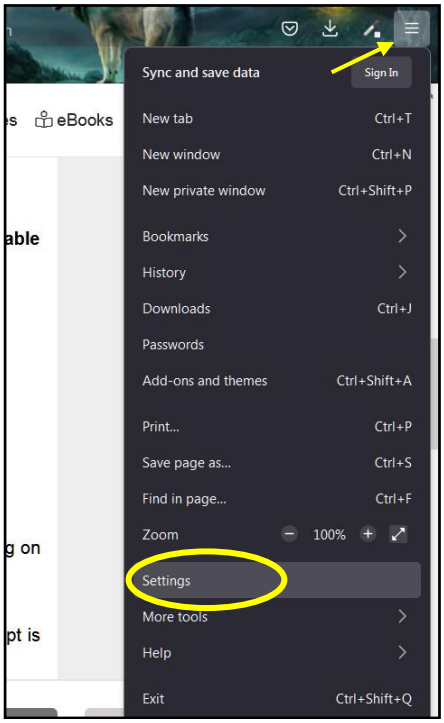

7. Under **Pop-ups and redirects** change default behavior or enable pop-ups for particular site.

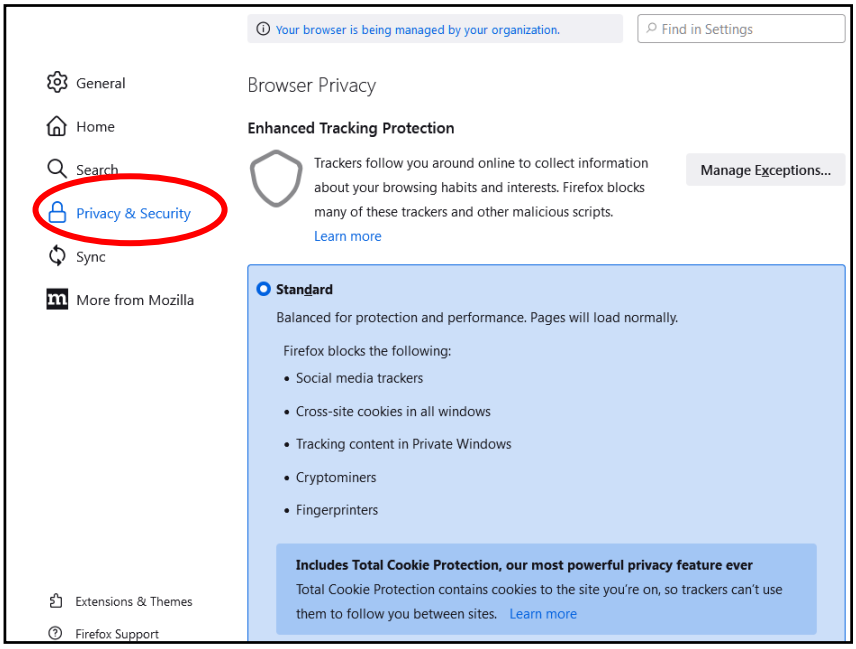

Firefox [Version 106.0 (64-bit)]

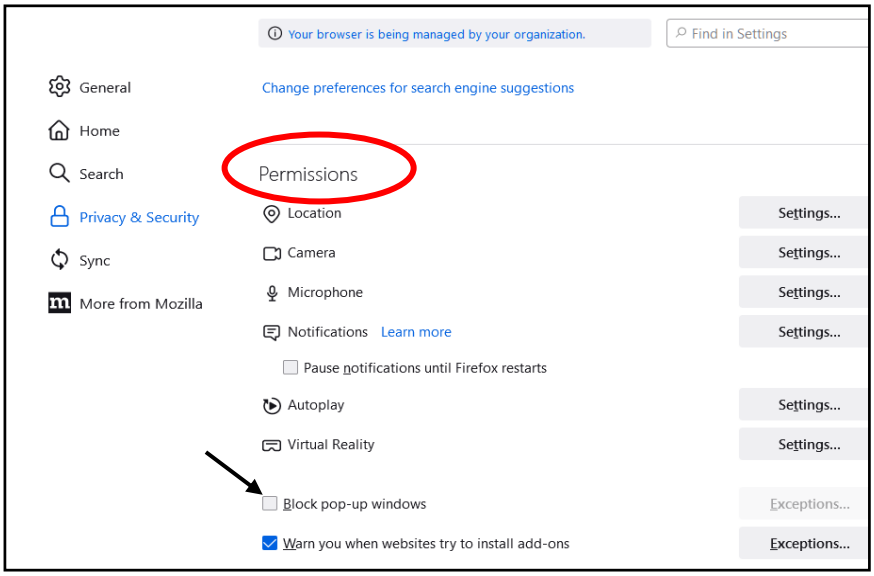

1. Click the **Open Application Menu button** ☰ and choose **Settings**.

2. Click on **Privacy and Security**.

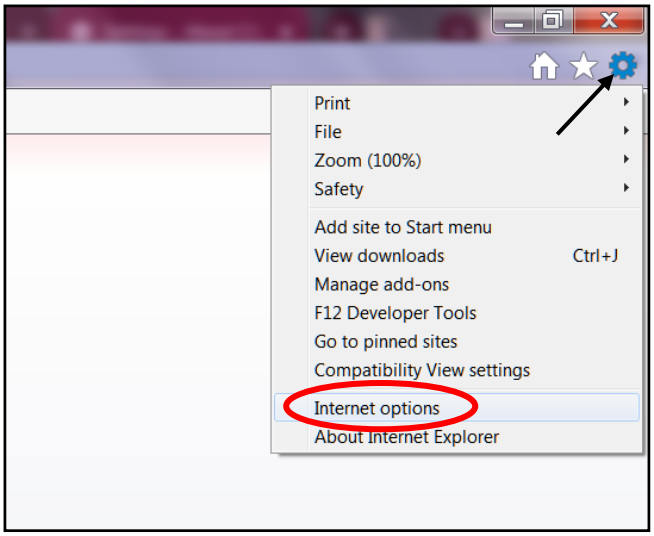

3. Scroll down to **Permission** section and uncheck the **Block Pop-up windows box**.

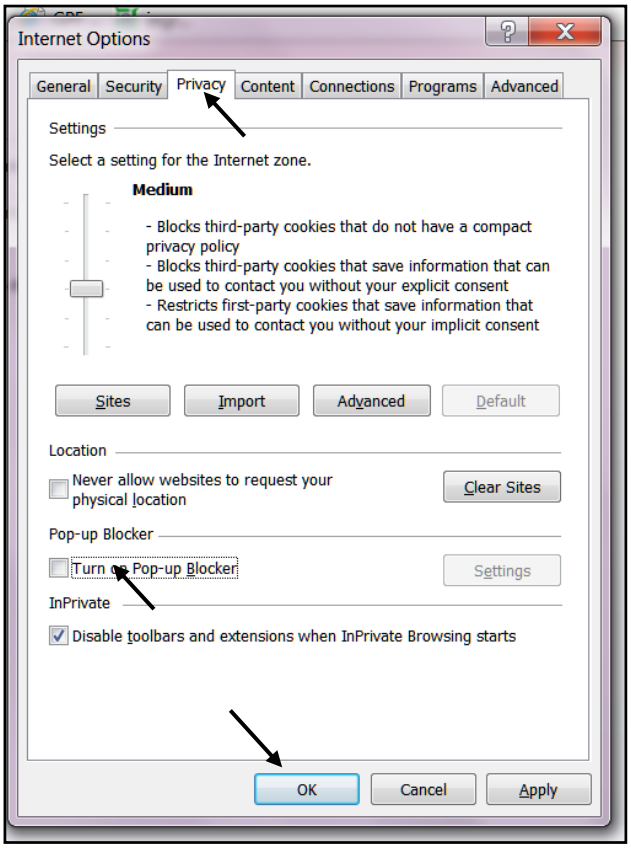

Internet Explorer (Version 11.0.9600.17843)

1. Open Internet Explorer, select the Tools button, and then select Internet options.

2. On the Privacy tab, under Pop-up Blocker, clear the Turn on Pop-upBlocker check box, and then select OK.

How to Enable the JavaScript in Chrome, Firefox, or Internet Explorer

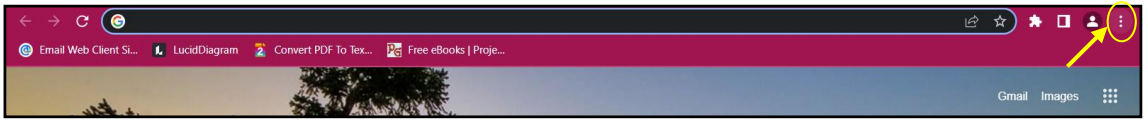

How to Enable the JavaScript in Chrome, Firefox, or Internet Explorer

(If the below mentioned instructions are not consistent with your browser experience, you may not be using the version that was current at the time this document was created. In this case, please search the internet for instructions on how to disable the pop-up blocker on your browser.)

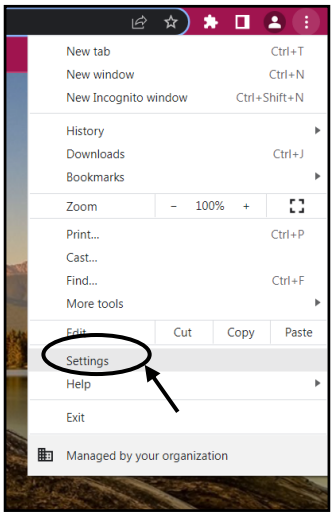

Google Chrome [Version 106.0.5249.119 (Official Build, 64-bit)]

1. On your computer, open **Google Chrome**.

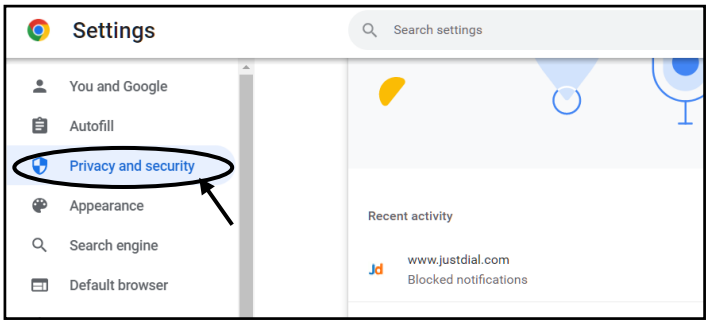

2. At the top right, click **Customize and control Google Chrome**.

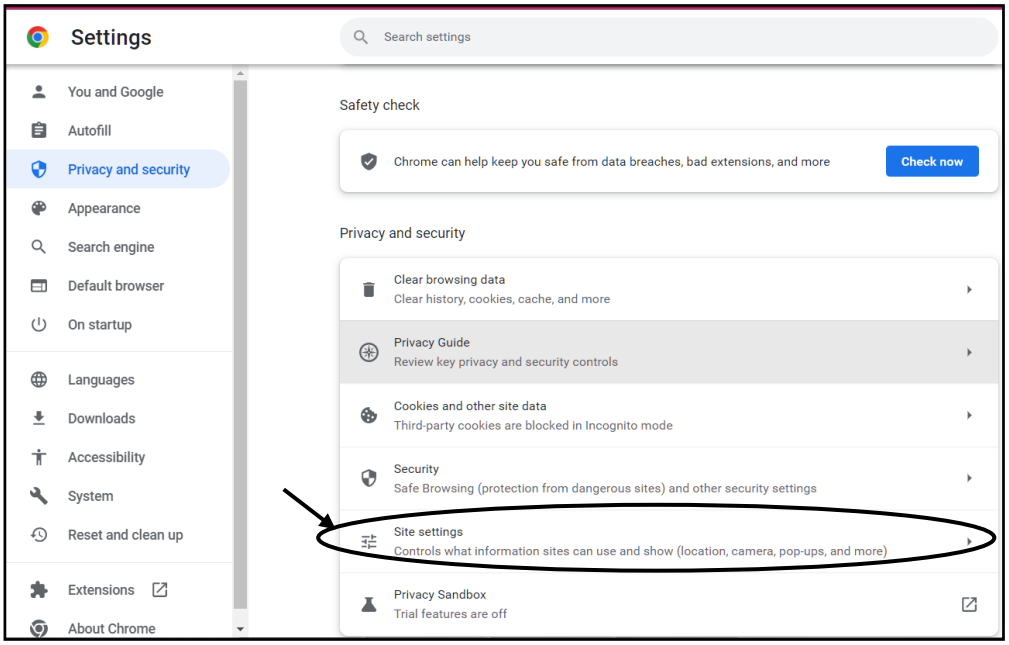

3. Click **Settings**.

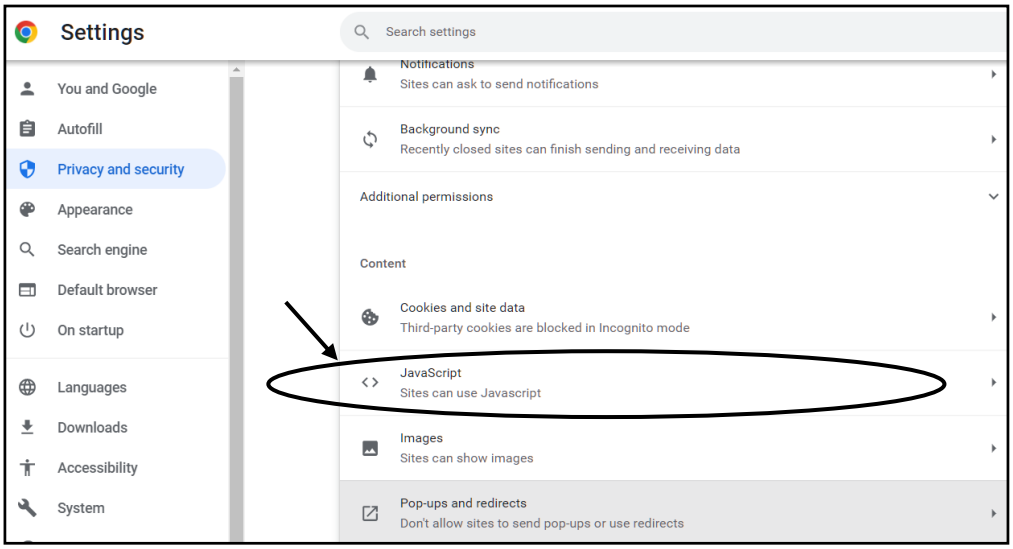

4. Click **Privacy and Security**.

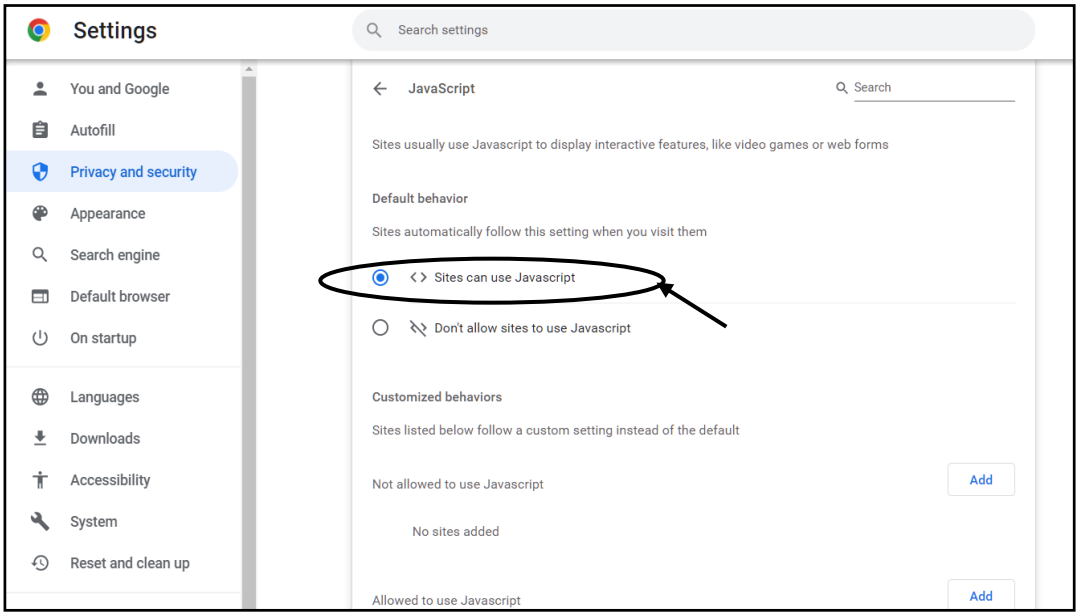

5. Click on **Site Settings**.

6. Scroll down and click on **JavaScript**.

7. Select **Sites can use JavaScript**.

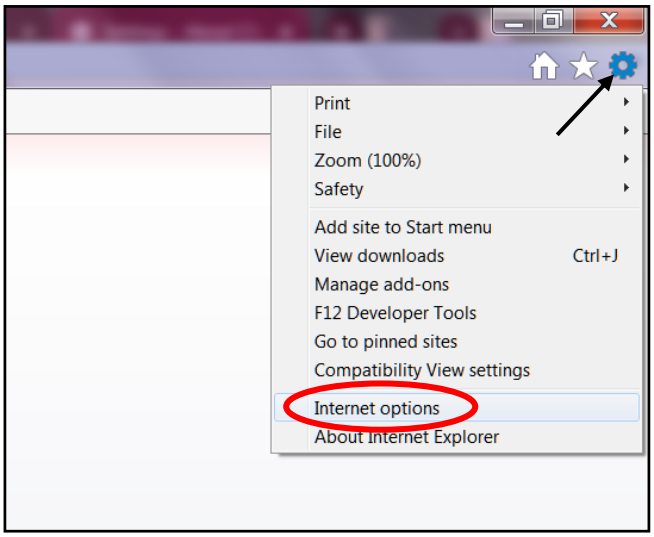

Firefox [Version 106.0 (64-bit)]

1. Open a new tab → type about: config in the address bar.
2. Then you will find the warning dialog. Select I'll be careful, I promise!
3. Then you will find the list of configure options in the browser.
4. In the search bar, type javascript.enabled.
5. There you will find the option to enable or disable javascript by right-clicking on the value of that option → select toggle.

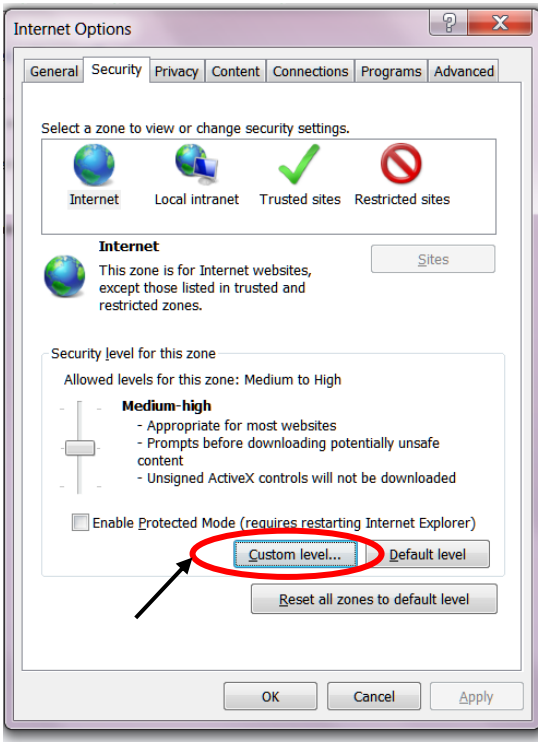

If javascript.enabled is true; it converts to false upon clicking toogle. If javascript is disabled; it gets enabled upon clicking toggle.

Internet Explorer (Version 11.0.9600.17843)

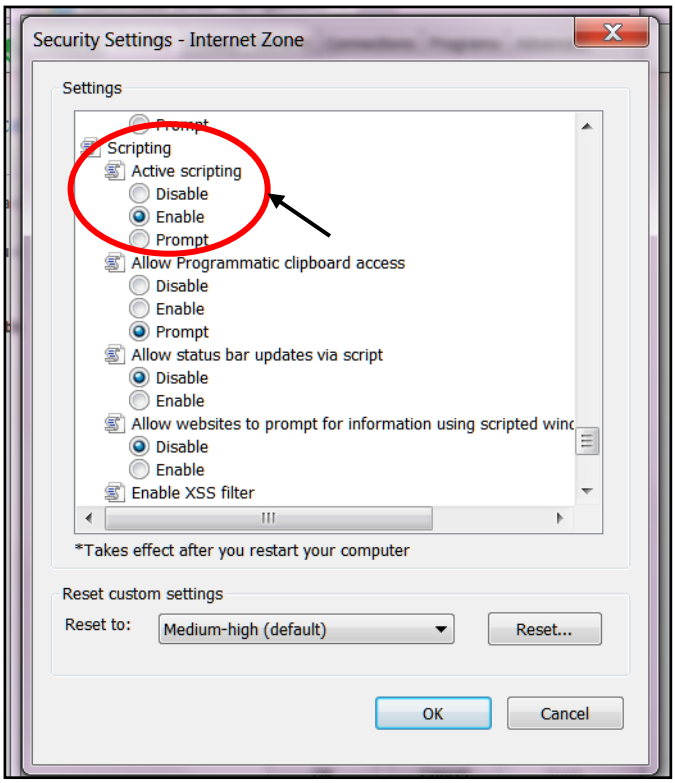

1. Open Internet Explorer, select the Tools button, and then select Internet options.

2. Click the **Custom Level** button under **Security** tab from the dialog box.

3. Scroll down till you find **Scripting** option. Then select **Enable** radio button under **Active scripting**.

4. Finally click **OK** and come out
